Re: AC# 3-BCS-J4 – Donald C. Beaver, T.W. Cecil, Richard J. Marsh d/b/a Brian Center  
Nursing Care/St. Andrews

We have performed the procedures described below, which were agreed to by the South Carolina Department of Health and Human Services, solely to determine the reimbursement rate to be used by the Department in determining the reimbursement settlement with Donald C. Beaver, T.W. Cecil, Richard J. Marsh d/b/a Brian Center Nursing Care/St. Andrews, for the contract periods beginning October 1, 1995 and for the twelve month cost report period ended September 30, 1994. This engagement to apply agreed-upon procedures was performed in accordance with standards established by the American Institute of Certified Public Accountants. The sufficiency of the procedures is solely the responsibility of the Department of Health and Human Services. Consequently, we make no representation regarding the sufficiency of the procedures described below either for the purpose for which this report has been requested or for any other purpose.

The procedures and the associated findings are as follows:

1. We considered the results of agreed-upon procedures applied to the reimbursable Medicaid program costs as shown on the Financial and Statistical Report for Nursing Homes, as filed by Donald C. Beaver, T.W. Cecil, Richard J. Marsh d/b/a Brian Center Nursing Care/St. Andrews, for the cost report period ended September 30, 1996, to determine if the results, when applied to the cost report period ended September 30, 1994, would have a material effect on the interim Medicaid rates. We found no material effect on the applicable rates as a result of these procedures.
2. We applied limited analytical procedures to the statistical data and reimbursable Medicaid program costs as shown on the Financial and Statistical Report for Nursing Homes, as filed by Donald C. Beaver, T.W. Cecil, Richard J. Marsh d/b/a Brian Center Nursing Care/St. Andrews, to identify significant changes in costs or statistics, if any, that would warrant the application of additional procedures. We found no significant changes as a result of these procedures.
